## ACCESSING THE DATABASE

To log onto the CIC On-Line Catalog, you must have an assigned Login ID. If you do not have a Login ID, please call 317-322-6491.

To log on to the database, follow the instructions below. The CIC Catalog will automatically be accessed when login is complete.

### DATAKIT Users

At the Destination prompt, enter:

ip/cic/nrl1.telnet.

(800)445-6759

Upon connecting, you will be prompted to enter your login ID, password, and terminal type. Acceptable terminal types include 4410, VT100, 5425, ANSI, TTY, KayPro, TEL, PT510 and many others. If you have questions about your terminal, please call 317-322-6491.

Be sure your Caps Lock and Num Lock keys are off!

## RETURNING TO MAIN THE SYSTEM

After logging in, the first screen display is the main function screen. You begin your keyword search at this screen and return to this screen to do new searches. At the prompt you type in search terms. To illustrate, let's assume we are searching for document listings about electronic mail. After typing in the words, press the RETURN key.

The screenshot shows a terminal window with the following text:

```

SEARCH RESULTS
=====
1. 1984-03-10 10:10:10 15104812280
2. 1984-03-10 10:10:10 15104812280
3. 1984-03-10 10:10:10 15104812280
4. 1984-03-10 10:10:10 15104812280
5. 1984-03-10 10:10:10 15104812280
6. 1984-03-10 10:10:10 15104812280
7. 1984-03-10 10:10:10 15104812280
8. 1984-03-10 10:10:10 15104812280
9. 1984-03-10 10:10:10 15104812280
10. 1984-03-10 10:10:10 15104812280

```

The system will locate all documents that have both the word electronic and mail in either the title or description. The key words do not have to be in specific order, nor even in the same sentence. In this instance, the system has located six document listings that have the words electronic and mail. (If there are more listings than the screen can hold, pressing the RETURN key repeatedly will automatically scroll you forward through the listings.)

To see the full record for a document, simply type the record number (1-6 in the example above) followed by the return key.

Note: The selections below the dashed line reflect the commands you can use to maneuver through the screens. See separate page for descriptions of commands.

All commands must be followed by the RETURN key.

10. 1984-03-10 10:10:10 15104812280

```

## LEAVING OFF

Type q followed by a carriage return anywhere in the system to log out. The system will ask for any comments you might have about the On-Line Catalog. If you choose to comment, typing a PERIOD "." on a separate line will end your session. If you choose not to comment, you can just type the PERIOD "." followed by the return key.

## COMMANDS

- Return to main screen to start a new search.
- Move forward/back in display. The sign can be followed by a number to move forward or backward a specific number of screens. Press the PF-7/END key will also advance you in the display.
- Modify present display. This command will take you back to screen #4 (see above) where you can reduce the set by adding key words.
- Print present display...this command does not work
- Type in record number and press return to see full display of item.
- Give additional help. This command illuminates a screen that explains the commands at the bottom of the screen and explains how to exit the system.
- Put up brief displays. This command is used when you are looking at a full record and would like to return to the abbreviated listings of documents
- Quit
- Back screen

All commands must be followed by the RETURN key.

## SEARCH TIPS

Use the truncation "\*" symbol to retrieve all key words beginning with a specific string of characters. For example, the term *admin* would return all key words starting with *admin* including *Administrator*, *administration*, *Administer*, etc.

The "\*" symbol can also be used as a wildcard character where spelling of a term is uncertain. For example, *re\*work* would retrieve *man*, *men*, *man*, *men*, etc.

Always use the truncation "\*" symbol when searching by document number, even when retrieving a specific number. Many documents have suffixes at the end of the number and the use must not be ignored. For example, 555006217 and 555006217.1 and 555006217.ABET.

Use the file "\*" symbol to search for a range of numbers. For example, 225000000-225000000 will retrieve all document listings that have 225000000 as the first seven digits of the range.
